How to clean and disinfect ICE games

**General cleaning first.** You should start with thoroughly cleaning the game with a solution of soapy water. Most dish soaps are not designed to kill bacteria or viruses. This is to only remove the grease and dirt from the game. Do not pour the solution directly on the game but use a clean rag; dip, twist (to remove excessive moisture), and scrub until clean. All plastic balls and Bean bags can be cleaned directly in the solution of soapy water. Bean bags need to dry fully before use.

**Disinfect the game.** Wipe down all areas using a disinfecting bleach solution and let air dry.

Lastly, **clean clear plastics and glass for a streak clean finish:** DO NOT USE ammonia based cleaners! These cleaners will damage the plastic.

**HOW TO MAKE VARIOUS CLEANERS**

**How to make a 5 gallons of soapy water (discard after 24 hours)**

1. 5 tablespoons or 1/3 cup of soap powder.
2. Stir well until suds form.
3. Soapy Water for Cleaning

**How to make a 1 gallon of soapy water (discard after use).**

1. 1/2 Cup or 4oz of Dawn dish soap
2. 1 Gallon or 4 Quarts of water

**How to make your own disinfectant.**

1. 2 Teaspoon of bleach
2. 1 quart of water
How to clean Air FX

*General cleaning first.* You should start by thoroughly cleaning the game with a solution of soapy water. Most dish soaps are not designed to kill bacteria or viruses. This is to only remove the grease and dirt from the game. Do not pour the solution directly on the game however, use a clean rag; dip, twist (to remove excessive moisture), and scrub until clean.

Damage will occur if you directly pour liquid on your game.

Do not immerse the paddles into the soapy water.

Pucks can be immersed into the Soap water.

How to disinfect Air FX games.

*Disinfect the game.*

**Step 1:** Start a game to release the puck.

**Step 2:** Wipe down the puck and paddles with a disinfectant solution. Don’t worry about cleaning the felt at the bottom of the paddle with a disinfectant solution. *LET AIR DRY.*

Step 3: Wipe down the coin door and both puck return areas with a disinfectant solution. *LET AIR DRY.*
**Step 5:** Wipe down the areas where the players play with a disinfectant solution. LET AIR DRY.

**How to make a 1 gallon of soapy water (discard after use).**

1/2 Cup or 4oz of Dawn™ dish soap + 1 Gallon or 4 Quarts of water

**How to make your own disinfected.**

2 Teaspoon of bleach + 1 quart of water
How to clean All In

*General cleaning first.* You should start with thoroughly cleaning the game with a solution of soapy water. Most dish soaps are not designed to kill bacteria or viruses. This is to only remove the grease and dirt from the game. Do not pour the solution directly on the game but use a clean rag; dip, twist (to remove excessive moisture), and scrub until clean.

*Damage will occur if you directly pour liquid on your game.*

Be sure to clean around the ball handle and top control panel.

How to disinfect All In

*All steps require the use of a disinfectant solution.*

*Step 1:* Wipe down the ball handle.

*Step 2:* Wipe down the coin entry, coin reject, DBV areas and ticket dispensing area.

*Step 3:* Wipe all areas at the front where the player could come in contact with when playing.

LET EVERYTHING AIR DRY.

Clean the clear plastics that protect the playfield area but only after wiping down with soapy water and disinfecting. *DO NOT USE ammonia based cleaners!* These cleaners will damage the plastic. We recommend a plastic cleaner like Brillianize.

How to make your own disinfected.

* Wear eye and hand protection when handling bleach products.
How to clean Angry Birds

General cleaning first. You should start with thoroughly cleaning the game with a solution of soapy water. Most dish soaps are not designed to kill bacteria or viruses. This is to only remove the grease and dirt from the game. Do not pour the solution directly on the game but use a clean rag; dip, twist (to remove excessive moisture), and scrub until clean.

Damage will occur if you directly pour liquid on your game.

Clean the clear plastics at the front and both sides after wiping down with soapy water. DO NOT USE ammonia based cleaners! These cleaners will damage the plastic. We recommend a plastic cleaner like Brilliance.

How to disinfect Angry Bird games.

Disinfect the game.

Step 1: Wipe down the control handles with a disinfectant solution. LET AIR DRY.
**Step 2:** Wipe down the plunger with a disinfectant solution. Don't worry about the felt at the bottom of the paddle with a disinfectant solution. **LET AIR DRY.**

**Step 3:** Wipe down the coin entry, coin reject and DBV areas with a disinfectant solution. **LET AIR DRY.**

How to make your own disinfected.

2 Teaspoon of bleach + 1 quart of water

* Wear eye and hand protection when handling bleach products.
How to prepare your disinfectant for use in basketballs.

Required items:

- 6 gallon bucket - 5 gallon will not fit a basket ball.
- 5 teaspoons of Bleach
- 1/2 cup of Dawn dish soap (or any dishwash degreaser)
- 1 gallon of water
- Rubber gloves

Pour both the bleach and dish soap into water and stir. After foam forms from stirring, pour the solution into the 6 gallon bucket. Do not worry about fully filling the bucket. You need room for the ball.

NOTE: Solution is only good for 24 hours. Discard solution daily.

Drop one ball at a time into the 6 gallon bucket with the solution you made. Use the brush to scrub the ball and release any grim and dirt that has accumulated onto it. If you are only disinfecting the ball, leave the ball in the solution for at least 30 seconds, rotating it to allow the entire surface to be exposed to your solution.

Then remove the ball and place on a towel to air dry.

* Wear eye protection when handling any bleach products.

6 gallon buckets are available at Uline.com, order model number S-11862W. 1-800-295-5510
How to clean Gold Fishing

**General cleaning first.** You should start with thoroughly cleaning the game with a solution of soapy water. Most dish soaps are not designed to kill bacteria or viruses. This is to only remove the grease and dirt from the game. Do not pour the solution directly on the game but use a clean rag; dip, twist (to remove excessive moisture), and scrub until clean.

**Damage will occur if you directly pour liquid on your game.**
